

## **12.03.05 Laser Engineering and Laser Technologies**

### **Laser Systems and Technologies**

#### **Program objective**

to train qualified specialists for R&D of laser systems and devices for various purposes, development and application of laser technologies.

#### **Program's competitive advantages**

- modern research with the use of analytical and technological equipment (incl. MEPhI Laser Center)
- laboratory practical training at high-power fiber lasers
- participation at WorldSkills international program
